Accuratus S35A - Professional & Durable Fully Customisable USB Keypad with 35 Programmable Cherry MX Keys **FCC E**

About

The S35 keypad is a fully programmable 35 key durable keypad designed for heavy use and multiple users. The Cherry MX black mechanical key switches give this keypad excellent durability and product lifespan. The keypad can be updated with additional double, quad or blanking keys to speed up any data input and ease of use. The key tops have a removable cover so you can put any colour/text or direction on any key making this the easiest programmable keypad to use.

The Accuratus range of programmable keypads are supplied with a free Windows downloadable application so they can be programmed to suit any bespoke application. The programming is stored within the keypad, once programmed the keyboard can be plugged into another computer and all programming will still be the same, the programming software does not need to be installed on every computer. This offers excellent flexibility so that the keypad can also be used on Mac and Linux computers once it has been programmed on a Windows computer. Our team are on-hand to assist with any programming requirements if you or your customer needs any help, we can even customise this keypad for any bespoke requirements if needed.

Specifications
