THE SMART CHOICE FOR KIOSK & POS APPLICATIONS FM80 & FR80 SALMON AI

AI-powered barcode detection and OCR technologies for a superior scanning experience.

The Salmon Series is being updated! The FM80 and FR80 Salmon AI now feature AI-powered barcode detection, using computer vision and self-learning technology to accurately read barcodes even in challenging conditions. They also feature advanced OCR technology to scan and extract text from IDs and official documents.

With a large scanning window, these scanners improve efficiency in fast-paced environments like retail and airports. The FM80 is designed for easy kiosk integration, while the FR80 is perfect for counter setups. Both devices suit various applications, including self-service checkouts, border control, postal sorting facilities, and point-of-sale systems.
